

Goomba Smackdown!!'s SM64DS
v1.1 Action Replay Codelist

3D Altering Codes

Super Spaz

Watch Mario twitch from one awkward position to the next.

02044314 00000000

Twitchy Mario / Get Down Mario

Everything *twitch* seems *twitch* normal!

020443F8 00000000

Funny Title Screen

Not too interesting in the game, but the floating Mario head in the beginning is hilarious!

02044343 00000000

Plain Bizarre

I don't know what to say...

020516A4 00000000

LSD Mario 1

Mario's a trippin'! Yippee!

020517DB 00000000

LSD Mario 2

The above code on steroids.

020517e7 00000000

LSD Mario 3

Hmm... Mario seems to be the only thing affected this time. Also, you will have to enter the castle through the door in the moat...

02051874 00000000

LSD Mario 4

Number 4. :|

02051799 00000000

Some Incredible Unknown Drug Mario Cooked Up In His Basement

HE'S TRIPPIN' BALLS!

02051762 00000000

Missing Shadow And Some LSD

Blahblahblah.

0205153a 00000000

Midget Mario and The Wonky Camera

And for some reason, the moat is filled. :|

02051821 00000000

Waist Beams

Mario and other's waists have turned into super long beams! Oh snap!

02051759 00000000

Super Long

Beam insanity! Run away! AAIIEE!!!

020517a7 00000000

Mario's Flailing Right Arm

Try crawling with this code on. XD.

02044332 00000000

Sinking Mario

When this code is on, Mario is up to his waist in...ground. And apparently, so are the doors. Jinkies!

020443ab 00000000

Sideways Ball Mario

Mario's curled up in a ball, is laying sideways, and flaps his hands around when he runs. Like me sometimes.

02044365 00000000

Tesseract / Origami Reality

Nothing makes sense, yet it all does. Isn't it all so clear?

020522ff 00000000

Super Tesseract

More universe imploding action.

02052366 00000000

Flicker Mario

Mario is invisible every other frame.

020443a0 00000000

Flapping Mario / Exaggerated Run

Not too interesting a code, but it looks funny when you run. 😊

020444aa 00000000

Mario's Escaping Soul (Just Wants to Dance)

Every other frame Mario is in some strange position. Best viewed in first person view (press X twice).

0204447d 00000000

Spirit in Front

Mario's spirit is in front of where the actual object for Mario is. Also, check out Mama Penguin. O_O

220443cc 00000000

No Head...!!!

WTF? Lol.

Spastic/Twitch World

Feel free to edit the values. I HIGHLY suggest not using this code if you have ever had a seizure, not kidding. I think this code may alter the height of the level and objects, but it's twitchy due to Action Replay lag.

02094a3c 00000000

Jello World

I believe this code alters the perspective that which you see the 3D objects/levels. But, like the last code, the code will seem spastic and twitchy due to AR lag. Feel free to edit values.

02094a40 00000400

Zero Gravity

This address edits the how high each object is at (not the whole level though). AR lag, of course. Edit values to your liking.

Color Codes

Neon Pixel Land

Neon... colors... pixels...

02044941 00000000

Pixelly Barf Land

The actual effect of this code isn't too interesting, it's just that I have never seen a color code in the 0209's before.

0209e1e8 00000000

Glitchy Textures

Some, not all, textures are strange. Also, OMG, look at the sun! D:

02044988 00000000

More Glitchy Textures

Like the previous Glitchy Textures code, but less interesting, LOL

2204498b 00000000

Invisible...Everything

Everything but the level is invisible.

02051833 00000000

DigiCamo

With this code on, some textures look like DigiCamo.

02044655 00000000

Live Size Edit

Controls: Press Select to enter Size Edit Mode. Left and Right arrows to change your width, Up and Down arrows to change your height, hold L and the Up and Down arrows to change your Length, and hold R and the Up and Down arrows to change your overall size. Press B (or jump) to exit Size Edit Mode. Press L+R+Start to reset your size.

NOTE: This code does *not* work in the startup area. Everywhere else, it works fine.

Because this code is so long, it glitches up the Trainer Toolkit's live Action Replay. That's a good sign, right? 🍷 Due to the sheer length and complexity of the code, expect some occasional lag and framerate dropping with the code activated.

Also... Take Note Of...

OMG... Thin?!?

This code has the same effect as

Sound When Entering Startup Area

I found this interesting code via debug menu. It makes the same sound it would, when entering the beginning area, out in front of the castle, that it would if you fell from that level with all the clouds and red coins and stuff.

Phase Through Random Stuff

Mario walks through random things... like blocks, paintings, and some other stuff. Also, for some reason, touching the giant block things in the desert level hurt you. Don't know why.

Pase Through Random Stuff 2

In this code, Mario phases through a lot more stuff, unfortunately including doors and paintings (more so than the original).

Everything is WRONG

The camera is stuck in one spot, and the trees and music are long gone. Why is this happening?!?

Everything = LAVA

You should've seen my face when putting this in the TT Runlist. XD

Music Volume

00 = No Music

0a = Very Faint Music

7f= Normal Music

This code never makes the music "loud", so don't worry about blowing out your DS's speakers or anything.

Reading/Not Reading

0 = Never Read a Sign

1 = Always Be Reading a "Sign" (You can move while the value is 1, don't worry.)

Due to lag in the Action Replay, the text box will get a pixel big, and stay there, and will resemble a stuck pixel. Don't worry, it isn't permanent.

Mario's A Slow Reader/Sign Trap

Yeah, don't use this code if you were doing anything important.

Camera View

02094648 = First sign area (the sign directly in front of startup area)

02094948 = View of startup area (where in beginning cutscene Mario, Luigi, and Wario would jump out of pipes)

02094748 = Camera in one point, pivots with arrows.
